

# 4Life® Transfer Factor™ GluCoach

TARGETING GOOD HEALTH THROUGH BALANCE

Maintaining healthy glucose (sugar) levels is an important part of pancreatic health. It's an even more important factor for people interested in supporting the health of their metabolic and endocrine systems. When these systems function optimally, they produce or properly use insulin, a hormone needed to convert sugar, starch and other foods into the energy that sustains life.

4Life Transfer Factor GluCoach is formulated to promote healthy glucose levels\* in the body and provide support for both the metabolic and endocrine systems. In addition to patented Targeted Transfer Factor technology, Transfer Factor GluCoach is formulated with minerals, herbs and phytonutrients that have been clinically shown to support healthy hormone production, support glucose tolerance and promote pancreatic health.

## Key Points

- **Supports Healthy Metabolic Function:** Pterocarpus marsupium, momordica charantia (bitter melon) and gymnema sylvestre are all well known for supporting balanced glucose levels. Both pterocarpus marsupium and gymnema sylvestre have also demonstrated an ability to promote the healthy function of the pancreas. Bitter melon has been shown to support glucose tolerance and aid the body's ability to process sugars.

Ginseng and fenugreek are herbs that have been shown to support healthy glucose levels. In addition, normal glucose tolerance is further supported with chromium.

- **Strengthens Immune Response:** Transfer factors are tiny molecules that transfer immunity information from one entity to another. These "smart molecules" support healthy immune responses, speeding up the recognition phase of a health threat and promoting your body's ability to remember past invasions. 4Life Transfer Factor GluCoach provides the benefit of Targeted Transfer Factor for excellent support to your metabolic and endocrine systems.
- **Provides Antioxidant Support:** Alpha lipoic acid (ALA) has been shown to provide important antioxidant support for the body. ALA also promotes healthy blood sugar levels.

## Technical Points

- 4Life Transfer Factor GluCoach is the third Targeted Transfer Factor product from 4Life and is backed by an exclusive patent (U.S. Patent 6,468,534, 4,816,563 and 6,866,868) for obtaining and blending specialized transfer factors from colostrum and egg sources.
- 4Life strongly recommends the use of BioEFA in combination with 4Life Transfer Factor GluCoach.

\*For those individuals with levels already in the normal range.

**DIRECTIONS FOR USE:** Adults take four (4) capsules daily with 240 mL of fluid.

**Serving Size:** Four (4) Capsules  
**Servings Per Container:** 30

## Consumer Information

**Active Ingredients: Each capsule contains**

Transfer Factor E-XF™ (Containing colostrum powder-bovine 35 mg and lecithin-egg 15 mg)	50 mg
Trigonella foenum-graecum extract equivalent to dry seed	500 mg
Pterocarpus marsupium (Indian Kino) extract equivalent to dry heartwood root	3.2 g
Momordica charantia extract equivalent to dry fruit	560 mg
Panax ginseng (Korean ginseng) extract equivalent to dry root	200 mg
Standardised to Rg1, Rc, Rf, Rg2, Rb1, Rb2, Rc and Rd	4.8 mg
R, S-alpha lipoic acid	30 mg
Gymnema sylvestre extract equivalent to dry leaf	400 mg
Standardised to gymnemic acid	25 mg
Chromium	50 mcg

Store below 30°C in cool, dry place.
